

Arashi Walker

San Francisco, CA / 503-490-5479 / arashiwalker@gmail.com / arashiwalker.com

EDUCATION

UC Berkeley Extension, 2019. Coding Boot Camp.

Full stack web development and coding curriculum.

EXPERIENCE

Software Developer - Humaucracy Health. Remote 9/2019 - current.

Developing the Huamucracy Health healthcare portal. Features include offline access, in app payments, push notifications, user login authentication, and a reactive responsive interface.

Suite Server - Levy Restaurants. Portland, OR 9/2011 - 6/2017.

Providing general customer service within the dining establishment as well as escalating and resolving issues necessary to ensure guest satisfaction.

PROJECTS - <https://github.com/arashiwalker>

Yelpclone - <https://arashiwalker.github.io/busynotbusy/index.html>

Yelpclone uses Google Cloud Platform to geocode, marker cluster, and import data into maps. Additional features include nearby searches based on a user's location. Firebase is used to track page clicks and views throughout the application.

VR Code Playground - <https://codeplayground1311.herokuapp.com>

A VR room developed with A-Frame, MySQL, Node.js, EJS. VR Code Playground allows the user to dive into an enhanced multimedia virtual reality. In the VR Code Playground you will be able to write code, hang out with friends, communicate and interact with users within the playground and much more.
